Information Technology Committee  
Wednesday, March 16, 2016  
3:30-4:30  
Mrak Hall, Room 408

Meeting Summary

Members: Matt Bishop (Chair), Giacomo Bonanno, James Fadel, Michael Kleeman, Vladimir Yarov-Yarovoy, Jeremy Lea (AF Rep)

I. Mark Redican to discuss UCDNet 4

- Mark Redican and Chris Clements did a power point presentation on the new UCDNet 4 to gain the committee’s feedback. UCDNet 4 is “The University of California, at Davis has historically functioned under independently run IT organizations within academic and administrative departments. In an effort to improve efficiencies, performance and the security posture at the core level, Communication Resources has begun the process of defining the framework for the next iteration of the campus wired data network. We refer to this next iteration as UCDNet4, or simply Net4.”
- The goals of Net 4 are:
  - Provide adequate bandwidth for campus data needs
  - Secure Campus network traffic with robust next generation firewalls
  - Reduce the management burden associated with departments operating multiple firewalls
  - Define a scalable structure to manage IP address space (IPv4, IPv6, and private)
  - Support advanced research in data networking
II. Summary of CIO Tom Andriola’s Visit to UCD campus- Tabled

III. David Levin to discuss new LMS implementation
   - David Levin, Director of Academic Technology Services, updated the committee on the status of the LMS transition. Canvas is currently in the Pre-Launch phase, with the majority of the campus using Canvas by winter 2017, and fully transitioned by August 2017.
   - The transition will be supported 24/7 by instructional technologists.
   - Faculty and TAs will be trained on the new system
   - Canvas workshops will be held on September 9th, 2016
   - For questions regarding the transition, please email movetocanvas@ucdavis.edu

IV. BigFix discussion
   - Response posted to ASIS whiteboard on 3/8/16

V. Other Business

VI. Committee Meetings
   - Will schedule at a later time
