January 5 Assessment Meeting
Summary
Attendees: Ed Caswell-Chen, UGC Chair; Ed Dickinson, UIPRC Chair; Daniel Cebra, GEC Chair, Debbie Stacionis, analyst
GEC chair would like to send specific feedback to each program. AS Chair Knoesen suggests that GEC follow the same process as UIPR and forward GEC assessment information to program chairs, Deans and Provost.

GEC chair feels that the GEC report should be kept separate from the final UIPR/UGC report to the Provost. GEC can send a letter to each program with suggested improvements or observations and then write an overall summary of GE assessment of those programs in the cluster to the Provost.

GE courses will be assessed by each program in the cluster to assure the literacies are still being taught; thus program assessment of GE courses will occur every 7 years. GE courses will be determined from data from the Registrar’s office, and a template will be provided to the programs for them to determine the following for each course:

- The course meets learning outcomes for the currently approved area.
- The course will be adapted to meet learning outcomes for the currently approved area, and the instructor will submit a revised syllabus to COCI by a specified date determined by GEC.
- The course meets learning outcomes for an alternate GE area; the instructor will submit a GE course proposal form to request a change to the appropriate area.
- The course does not meet learning outcomes for the currently approved area; the instructor will submit a GE course proposal form to request removal of the course from the GE Program.

A letter will be sent to program chairs with an explanation and instructions on how to assess courses. Responsibility for assessing each course will be on the instructors. The list of courses and template will be sent to each program chair for them to assign to instructors or determine who will assign to individual instructors of GE courses.

GEC will each year in late February receive the most recent list from the Registrar’s office of all GE courses including enrollment and quarters each class is taught. (Debbie has already put in this request for 2015-16 data for Cluster 3 to Edwin who will pass along to Elias with a deadline of March 1 to receive data.) From this list, GEC will determine what courses they would like to assess for upcoming spring and
following fall. The requested courses will be given to programs at the Cluster Kickoff Meeting which will be held in early March. Requested GE data from programs for Cluster 3 and beyond will include the course syllabus, one exam, one assignment and three pieces of student work from that assignment. The student work samples should consist of one average, one below average, and one above average.

Timeline:
January 8        UGC will finalize UIPR revised section 8 of self-review template.
