STEVEN M. THEG, CHAIR

Faculty Executive Committee from the College of Biological Sciences

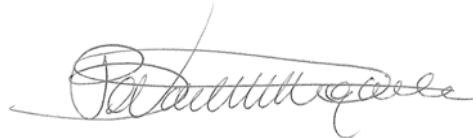

RE: Approval of a name change for the Genetics major, housed in the College of Biological Sciences

The request to change the name of the Genetics Major to the Genetics and Genomics Major was forwarded to all Davis Division of the Academic Senate standing committees and Faculty Executive Committees from the Schools and Colleges. Responses were received from Undergraduate Council and the Faculty Executive Committee from the College of Letters and Science.

The committees support the change in name of the major to Genetics and Genomics. The change is considered a beneficial move for the department.

The Davis Division of the Academic Senate approves the name change of the major to Genetics and Genomics. I have copied Vice Provost and Dean de la Pena. In the past, major name changes have been reviewed by the Council of Deans and Vice Chancellors following Academic Senate response.

Sincerely,

A handwritten signature in cursive script, appearing to read 'Bruno Nachtergaele', written in black ink.

Bruno Nachtergaele, Chair
Davis Division of the Academic Senate
Professor: Mathematics

c: Vice Provost and Dean Undergraduate Studies de la Pena
