Enrique J. Lavernia, Dean
College of Engineering

Re: Computational Applied Science Major

The Undergraduate Council has reviewed and discussed the proposal from the College of Engineering to discontinue the Computational Applied Science major. The proposal was also reviewed by the Committees on Planning & Budget and Elections, Rules & Jurisdiction. Undergraduate Council and Committee on Planning & Budget are concerned that admission to the major was reopened without the knowledge of the home department or the home college. Improved procedural communication between the Office of the Registrar and the affected departments/colleges is urged so that students are not admitted in error.

Undergraduate Council supports the proposal for discontinuation of the Computational Applied Science major as presented.

John Yoder, Chair
Undergraduate Council
